### **Disable proxy for Chrome on Windows**

Click the **Chrome** menu in the browser toolbar.

Select Settings.

Click Advanced.

In the System section, click Open your computer's proxy settings. ...

Under Automatic proxy setup, toggle Automatic detect settings Off.

Under Manual proxy setup, toggle Use a proxy server Off.

Click Save.

Feel free to roam around and familiarize yourself with the platform. I encourage you to **not wait** until the last minute to log on in case you
